P/N	Product
1006451	SDU 410 Safety Shutdown Unit
1100630	
1100232	

<table>
<tr><td>Description</td><td>For Cyber Security reasons, the Ethernet interface (COM3) of the SDU 410 is disabled by default.

This ensures that upon delivery, the COM3 interface is inactive, requiring no additional configuration or inspection from customers to meet Cyber Security standards.</td></tr>
<tr><td>Customer Impact</td><td>If the Ethernet interface is not connected or not in use, no impact.

If the Ethernet interface is in use, consider one of the following alternatives

<table><tr><th>Ethernet function used</th><th>Alternative</th></tr><tr><td>SDU 410 Web Configuration</td><td>Configure SDU 410 using
1. A DCU 410E / DCU 210E
2. A Modbus RTU client</td></tr><tr><td>3rd party Modbus TCP integration</td><td>Use Modbus RTU / COM2</td></tr></table>
If the installation still requires Ethernet connectivity on the SDU 410, discuss options with the relevant classification society.</td></tr>
<tr><td>Validity</td><td>Until otherwise noted.</td></tr>
<tr><td>Distribution</td><td>All contracted distributors.
Selected customers.</td></tr>
</table>
