</tr>
</tbody>
</table>

Max ripple 10% without exceeding Min and Max values.

**Installation Steps**

1. Remove the unit from the ESD Bag. Use the submitted Cabinet Frame and mount it in a suitable enclosure.
2. Attach the Power Supply connector (CON1) and make sure the power ratings are within product specifications.
3. Connect additional external connectors (CON2-4) according to specification related to the applicable application. This may include the following:
   * CAN bus (J1939)
   * All Faults
   * Switch Inputs
   * Magnetic Pickup
   * PT 100 Sensors
   * 4-20 mA Sensors
   * RIO Link
4. Use the submitted RJ45 Connector kit to ensure the IP rating. Use the submitted RJ45 Connector kit to ensure the IP rating.

**Configuration Steps**

At the first Power-Up the user will be guided through a Setup Wizard:

1. Language selection and your choice is valid through the rest of the procedure.
2. Network settings. Make sure to follow common network configuration practice and take care when several units need to operate within the same network.

**PC Connection/Setup:**

- Connect via Ethernet using a Net Browser
- From the Address Field in the Browser, type the IP-Address. Factory Default is 192.168.0.101.
- Then log in to the unit. Factory Default Username is ‘DCU’ and Factory Default password is ‘1234’.

For further details and information, please see the Configuration Manual.

**Responsibilties:**

It is the sole responsibility of the installer to ensure that the installation work is carried out in a satisfactorily manner and meet all applicable rules and regulations.

**Note:**

Auto-Maskin continuously upgrades its products and reserves the right to make changes and improvements without prior notice.
